## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 219-220 are rejected under 35 U.S.C. 103(a) as being unpatentable over Godefroy in view of Brantigan '915.

Godefroy discloses in figures 1-7 a fusion device, substantially as claimed. However, Godefroy doesn't disclose a thread that extends along substantially the entire length of the body. Brantigan teaches in figure 8 a fusion device comprising an arcuate portion (fig. 8) having a thread (32c, 32 d) that extends substantially along the entire length of body. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the thread extending substantially along the entire length of the body as taught by Brantigan '915 could be incorporated into Godefroy in order to be able to secure the body of the fusion device along the entire length of the aperture formed in the vertebrae.

### ***Allowable Subject Matter***

Claims 154-166 and 168-218 are allowed.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. No additional prior art was cited in this office action.
